ADJUSTMENT

ADJUSTMENT SEQUENCE

- 1. Power Supply Trim
- 2. HFO A Tuning
- 3. Waveforms Gen. Amplitude Adjustment
- 4. VCA Gain Adjustment
- 5. HFO B Tuning
- 6. ADSR Time Adjustment
- 7. VCF Offset Adjustment

All adjustments must be made after the instrument's power has been on for at least five minutes.

POWER SUPPLY TRIM

- 1) Switch on the instrument.
- 2) Set DVM to TP1 (.4016) and adjust P1 to read +15.000 V
- 3) Set DVM to TP2 (.4016) and read +5V ±5%.
- 4) Set DVM to TP3 (.4016) and adjust P2 to read -5.000 V.
- 5) Set DVM to TP4 (.4016) and adjust P3 to read 15.000 V.

Note: the supply must be fully loaded.

HFO A TUNING (.5009)

- 1) Press FREE, introduce saw-tooth A (L.E.D. WAVES), set CUTOFF to the max. and RESONANCF to the min.
- 2) Set MASTER TUNE to the center.
- Press the second 'A'(from the right) and adjust P1 to obtain a 440 Hz frequency (use a diapason).

WAVEFORMS GEN. AMPLITUDE ADJUSTMENT (.5011)

- 1) Press FREE.
- 2) Connect oscilloscope to TP9.
- 3) Introduce saw-tooth A.
- 4) Press the second 'E' (from the right) and set the saw-tooth amplitude to +4.800 Vpp operating trimmer P3.
- 5) Press the first 'E' (from the left three octaves lower than the former) and set amplitude to +4.800 Vpp operating trimmer P4.
- 6) Verify that the saw-tooth amplitude is +4.800 Vpp on the whole keyboard extension.
- 7) Connect oscilloscope to TP3.
- 8) Repeat point 4) operating P1.
- 9) Repeat point 5) operating P2.
- 10) Repeat point 6).
- 11) This adjustment is to be made for the 6 voices.

Adjustment Control

- 1) Connect oscilloscope to TP24.
- 2) Recall program 93.
- 3) Verify that the 6 voices' PW's are at 50%.

VCF CUTOFF AND RESONANCE ADJUSTMENT (.5011)

- 1) Recall program 91.
- 2) Connect oscilloscope to TP24.
- 3) Press any key and set the sine amplitude (any frequency), to 400 mVpp operating P5 of the voice indicated by the lit L.E.D.
- 4) Repeat point 3) for the 6 voices.
- 5) Set P8 to the center.
- 6) Connect freq.m. to TP24.
- 7) Press any key and set the sine frequency to 880 Hz operating P7 of the voice indicated by the lit L.E.D.
- 8) Repeat point 7 for the 6 voices.

ADSR TIME ADJUSTMENT (.5011)

- 1) Recall program 92.
- 2) Connect oscilloscope to pin 10 (IC 1) or to R7 of voice 1.
- 3) Press any key and set attack time to 5.800 seconds operating P10 of the voice indicated by the lit L.E.D.
- 4) Repeat point 3) for the 6 voices.

VCA GAIN ADJUSTMENT (.5011)

- 1) Press FREE.
- 2) Introduce saw-tooth A.
- 3) Set CUTOFF to the max.
- 4) Set RESONANCE to the min.
- 5) Connect oscilloscope to TP24.
- 6) Press middle 'C' and adjust P9 of the voice indicated by the lit L.E.D. to obtain a saw-tooth amplitude equal to 400 mVpp.

HFO B ADJUSTMENT (.5009)

- 1) Recall program 90.
- 2) Press any key and adjust P3 so as to eliminate the beat between HFO A and HFO B.

VCF OFFSET ADJUSTMENT (.5011)

- 1) Press FREE.
- 2) Set VCF CUTOFF to 3/4.
- 3) Set VCF RESONANCE to the min.
- 4) Connect DMM to TP24.
- 5) Without depressing any key, read voltage on DMM; e.g.:-1.34 mV.
- 6) Press any key and adjust P6 of the voice indicated by the lit L.E.D. so as to read the same voltage as per point 5) on the DMM.
- 7) Repeat point 6) for the 6 voices.

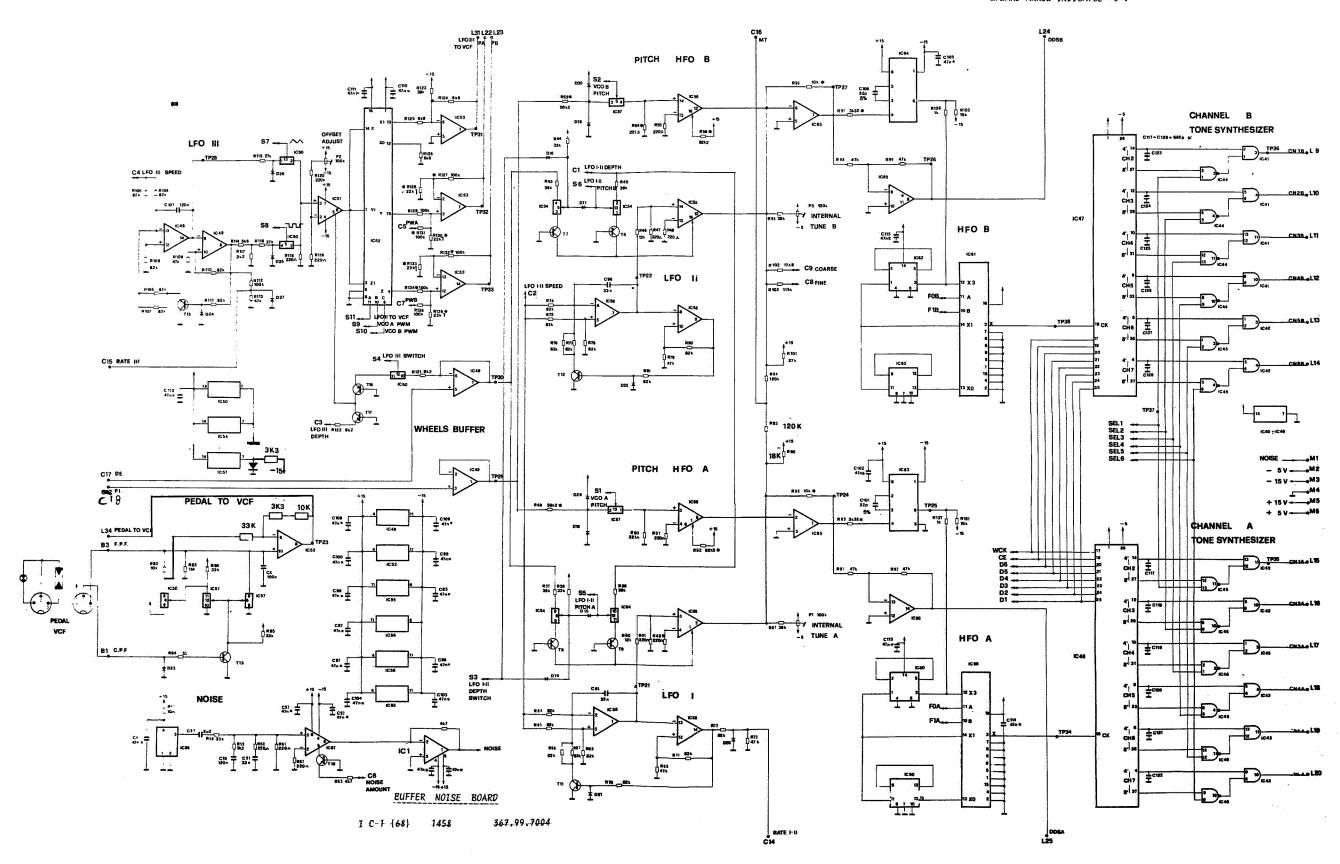

NOTES

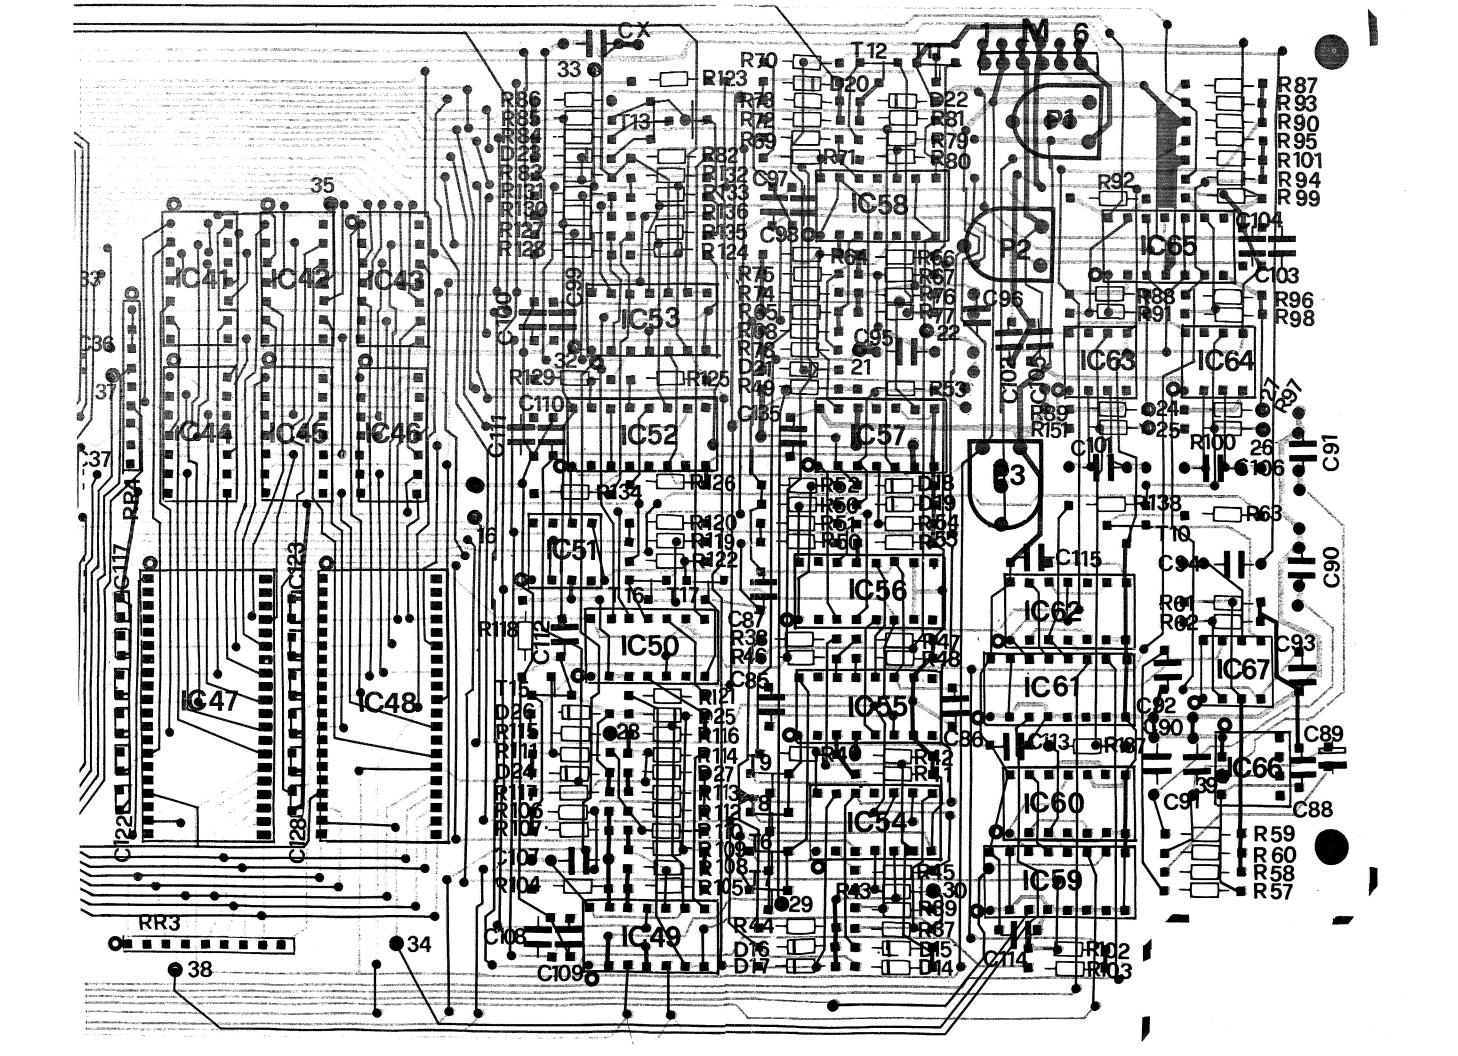

- R* IMPLIES SPECIAL RESISTOR
- C* IMPLIES CERAMIC CAPACITOR
- ALL PNP TRANSISTORS ARE BC 560 part code 364.99.0004
- ALL NPN TRANSISTORS ARE BC 239 part code 364.99.0005
- ALL DIODES ARE 1N4148
- ALL RESISTORS ARE 1/4 WATT
- ALL ELECTROLYTIC CAPACITORS ARE 16 V DC UNLESS OTHERWISE INDICATED.

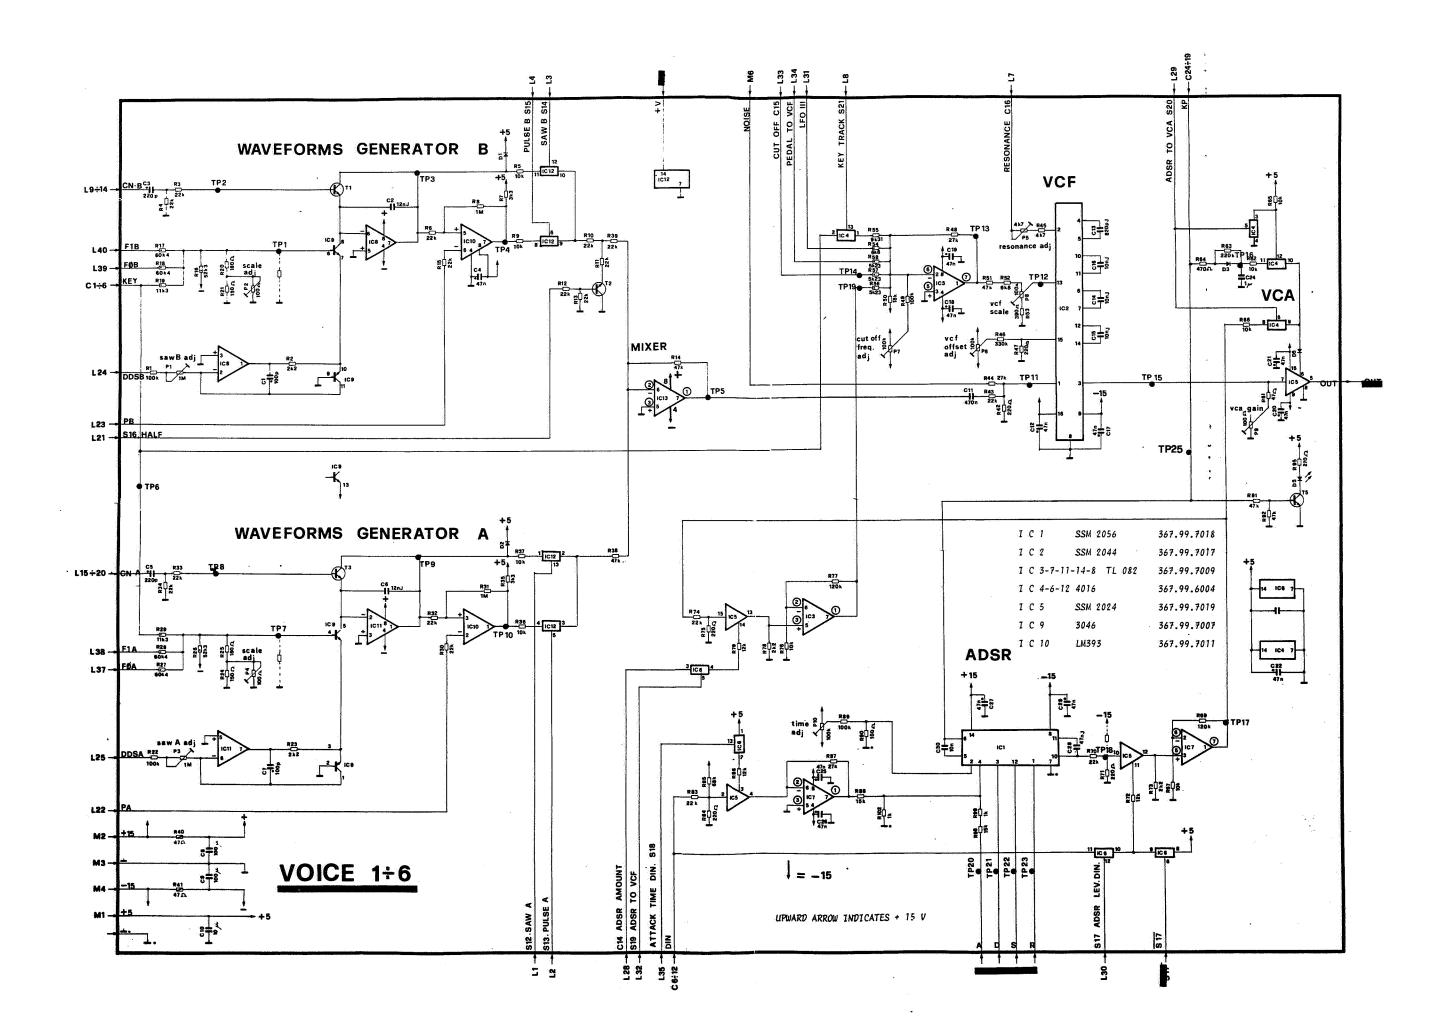

GENERATION SECTION P.C. 440 99 5009 OR 5010

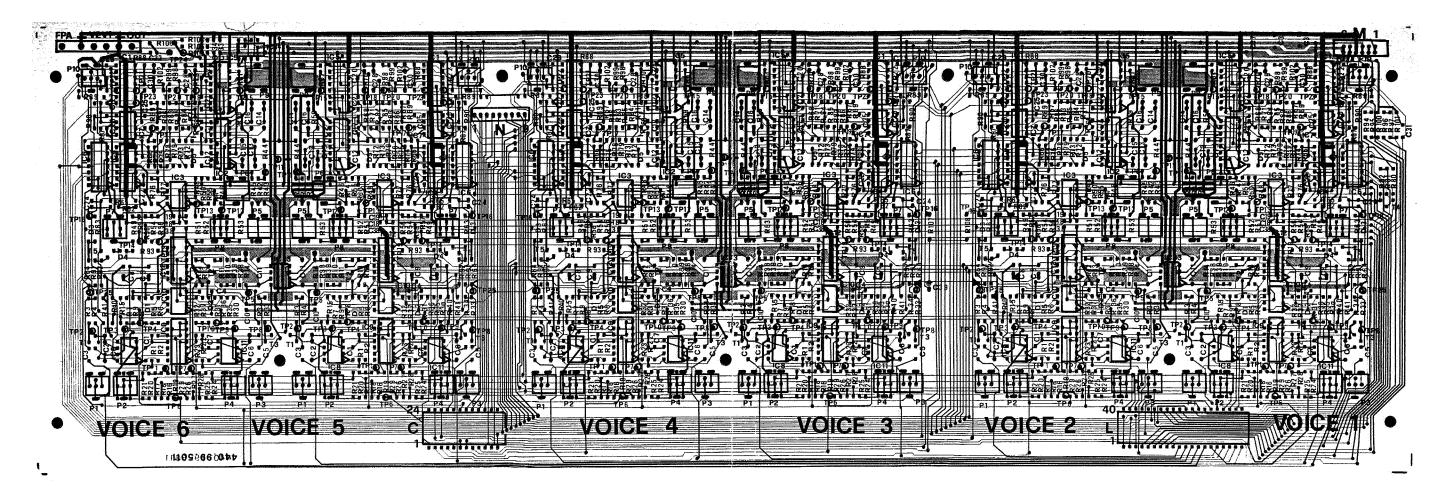

UPWARD ARROW INDICATES +5 V
